

Tooth Whitening

Looking great has never been this easy.

Welcome

Doctors Grahame Dutton and Christine Duxbury welcome you to Duxton Dental.

In 1996 we had a vision to create the ideal dental practice. We called it Duxton Dental. In 2002 we took a large step towards this when we opened our purpose-built state-of-the-art facility at 22 Bartlett Street.

Our quest for the ideal has entailed considerable effort in acquiring the best environment, staff and technology.

Day by day we continually strive to improve our client services. This is because we are very mindful that our success can only be measured by the satisfaction of our patients.

Philosophy

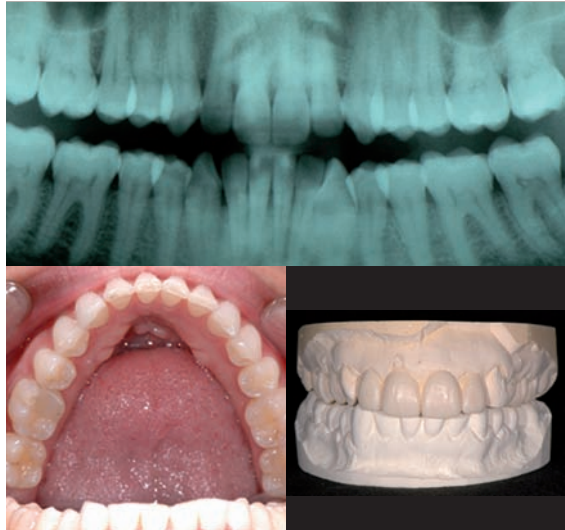

Our aim at Duxton Dental is to provide the highest standards of dental *health, function* and *aesthetics*, to ensure your well-being and to promote good health.

This will be accomplished by utilising the latest advances in *knowledge, materials* and *technology*.

Testimonial

"I'm always impressed by the high quality care and service I experience at Duxton Dental... I feel that the team at Duxton Dental have my best interests at heart... I'm confident that with their modern philosophies and technology, my teeth are in safe hands..."
- Kathy Connolly (Economic Analyst)

The new patient experience

Each new patient begins their partnership with Duxton Dental with an initial consultation. This consists of a thorough examination and includes

- a jaw scan
- laser decay detection
- bite analysis
- digital photos
- oral cancer screening
- digital x-rays
- saliva testing
- gum disease analysis
- decay susceptibility testing
- dental risk assessment

A careful, considered diagnosis is the most important component of any treatment plan. Once all the relevant information has been analysed your risk profile is determined. You are then presented your personalised written treatment plan.

Testimonial

"I've been visiting dentists for 41 years and my checkup at Duxton Dental was the most thorough and professional I've ever experienced." - G. Webb (General Manager)

Cosmetic dentistry

"A smile happens in a flash but its memory can last a lifetime".

Through a combination of tooth coloured restorations, cosmetic whitening and other advanced treatments, we can create a beautiful smile you will be truly proud of.

Our cosmetic services

- crowns to strengthen and beautify
- veneers to brighten and straighten smiles
- computerised porcelain to replace old amalgams
- implants and bridges to fill those gaps
- tooth whitening to enhance your smile

Amalgam alternatives

Cosmetic make - overs

Missing teeth - implants

Hygienist

Modern dental science tells us that the greatest threat to our teeth comes from the relentless attack from bacteria in the mouth which dissolves the bone surrounding the teeth. We also know that this ongoing infection gets into our blood stream and can be a significant factor in heart disease and stroke.

The primary role of the dental hygienist is to keep this disease at bay. This requires continuous focus and commitment to a preventative approach to disease.

Testimonial

"My Hygienist made my appointment as easy as possible with fun and gentle care. The results were immediate, the pain was gone and a week later I was back to my normal self, and a lot more aware of my teeth and gums!"
- Alesha Agnew (Corporate Host)

Active maintenance

The mouth has hidden breeding grounds where colonies of bacteria flourish - under the gums and between the teeth where it is dark, warm and wet.

These bacteria destroy the bone that anchors the teeth, leaving them loose. Most teeth are lost this way.

Like cholesterol, it is a silent painless disease. By the time any pain is felt, it is usually too late. The only symptom a patient may have is a little bad breath or a tiny amount of bleeding when cleaning.

Our program of Active Maintenance is the most rational, cost effective and internationally accepted way of preventing this disease.

Whitening

Lets face it, one of the first things you notice about people is their smile. When you meet someone with a bright, natural smile, it catches your attention.

However, over time, the natural ageing process and your lifestyle (smoking or drinking coffee, tea or wine) can stain your teeth.

Using our revolutionary technology, we guarantee a 6 to 8 shade whitening of your teeth. We offer a free initial consultation and the whitening process takes less than 90 minutes. The teeth are not damaged in any way with this procedure.

Testimonial

"Teeth whitening is a fabulous gift for a significant birthday. I received teeth whitening for my 40th, what a difference! I haven't stopped smiling since."

- Michelle Staples (Director - Zest people)

Weddings

Your special day is approaching and we know you want to look your best.

This will be the most photographed day of your life and all eyes will be on you. Your smile will be a reflection of your happiness. Now is the appropriate time to whiten or improve your smile.

Many cosmetic dental procedures can be completed in one or two hours. Allow us to help you achieve the beautiful smile you have always wanted.

Bad breath clinic

One breath into our Halimeter gives us a computerised analysis of your problem. Once diagnosed we can use our breakthrough treatment - Therabreath. A quick, simple, effective treatment that actually works. The effects are breathtaking.

Technology

Our state-of-the-art technology allows us to offer our patients services that are faster, better and less intrusive than most people might imagine. Technology that enhances your visit at Duxton Dental includes:

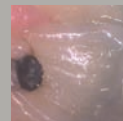

Digital X-rays
80% less radiation

Cerec
computer generated porcelain fillings and crowns in one visit

Heal Ozone
kills bacteria and heals early decay so no drilling is needed

Intra Oral Camera
magnified photographic images of your teeth so you can make informed decisions

Lasers
surgery without scalpels or stitches

The Wand
computer controlled injection machine

Air Abrasion
sandblasts small cavities without the need for injection

Diagnostic Laser
95% accuracy in identifying surface decay as opposed to as low as 25% using conventional mirror and probe examination

For more information

For appointments or more information on the services that are provided at Duxton Dental, all of our staff will be more than happy to help. Gift Vouchers available.
